

AC Schnitzer ACS5 2.0d Sport

AC[®]
SCHNITZER
beyond the standard.

In this age of punitive fuel costs, high road fund licence and exorbitant company car tax, opportunities to own a special car are few and far between. Fortunately you have found the solution.

It starts life as a run of the mill BMW 520d SE, which is a good place to start, but a bit of exclusivity and extra performance never hurt any body. That is where AC Schnitzer steps in. By adding our signature aerodynamic package, engine tuning, suspension and wheels we create a visually exclusive and exciting package.

**The AC
Schnitzer
ACS5 2.0d
Sport is
exclusive,
frugal & fun.**

Through the addition of our engine tuning package, which is extensively road tested over many months before being released to the public, we endow the ACS5 2.0d Sport with the most powerful 2.0d available in a BMW. It has 218bhp at its disposal and 455Nm of torque which exceeds the torque available from the 525d. Despite the additional power available it retains the excellent fuel economy of the standard car. The ACS5 2.0d Sport fits into the prudent band D emissions category for attractive benefit in kind executive motoring.

Aping the looks of models with larger engines, we add a dual exit exhaust system to add real visual presence to the back end of the car.

The driver's seat is a fantastic place to be but there is one problem: you can't see the fantastic car you are driving! So to stop you looking for highly polished buildings to drive by, we fit a few of our favourite interior accessories. Items such as our alloy wheel style i-drive cover and milled aluminium pedals give the interior a whiff of individuality.

If you are looking to mark yourself out from the crowd and draw envious glances from your colleagues in the car park, then the ACS5 2.0d Sport is for you.

**Exclusivity
has never
been so
affordable.**

AC Schnitzer Wheel design – Variety in Style and Technologoy
